

The King George County Extension office: 10087 Kings Highway, King George, VA 22485, will be holding a Virginia Household Water Quality Program clinic on August 24, 2022, for the residents of King George County. The goal of the Virginia Household Water Quality Program is to improve the water quality and health of Virginians with private water supplies. Anyone with a private water supply can participate. We will sell the well water kits during normal business hours beginning on August 15, 2022, at both offices, until August 23, 2022, and will be picking up the filled kits at those same offices early in the morning on August 24, 2022. The cost is \$60/kit, and tests for 14 different parameters that can affect health. Once the analysis is complete, results are returned to participants (in about a month) at an in-person meeting, where test results are explained, and information is provided about your potential water problems and solutions.

To register, or for any questions, please email Mike Broaddus at: broaddus@vt.edu , or call Missy at: (540) 775-3062 by August 5, 2022. More information such as dates and times of meetings for this well water clinic will be sent after August 5th.
