UTILITY SERVICE CONNECTIONS

Upon approval of the application for service and payment of applicable charges and fees, the service connection shall be made by the applicant in accordance with the procedures below.

- A. Separate service connection. A separate service connection shall be required for each premises unless otherwise determined by the Authority in accordance with Section 11 of Service Authority Regulations.
- B. Notice required. The applicant shall give to the Authority a notice of two business days for performing the required inspections or actual connection.
- C. Service line, service connection requirements. All laterals and service connections shall be installed by the applicant or his representative with materials and workmanship in accordance with the applicable specifications of the State Plumbing Code, the State Department of Health, and the Authority's Standards. Connection to the Authority-owned sewer mains, water mains, laterals and service lines shall be inspected and approved by the Authority's authorized personnel prior to backfilling. For single-family construction, the Authority will only furnish the tapping saddle, corporation stop, copper setter, meter and box for water lateral installation; tapping saddle and clean out for sewer lateral installation. The applicant or his representative shall extend the water and/or sewer service lateral from the Authority-owned mains to the structure.
- D. Applicant to bear connection expenses. The cost of material and labor for installing individual service and lateral lines shall be a cost to the applicant independent of any fees or charges required by the Authority. The applicant shall also be required to secure and pay for all such permits and fees as may be required. Such approval shall be in the form of a construction permit issued by the General Manager or his designee.
- E. Lines, connections property of Authority. All service lines and connections shall remain the property of the Authority, shall be under its sole control and jurisdiction. The Authority shall maintain the sewer connection (lateral) from the main to the property line. The owner shall be responsible for maintenance of the sewer connection (lateral) from the property line to the premises. The Authority shall maintain the water connection line (lateral) from the main through the meter. The owner shall maintain the water connection (lateral) from the meter to the premises.
- F. Change in location. Should a change in location of the water and/or sewer lateral be requested by the owner for any reason, the owner shall be responsible for the relocation and all associated costs. Such work shall be approved by the Authority's authorized personnel prior to backfilling. Should a change in location of the water and/or sewer lateral be required by the Authority, such costs shall be the responsibility of the Authority.
