## **King George County Service Authority Public Statement Regarding Covid-19**

The King George County Service Authority is closely monitoring updates on the Covid-19 virus. Our office is working closely with King George County Government to ensure that we maintain communication between the County and the Service Authority. The Service Authority provides essential services to residents of King George County and we will continue to provide those critical services throughout the duration of this situation.

We have an important obligation to help prevent the spread of the Covid-19 virus by educating our staff and exercising plans to mitigate any potential spread of the virus.

As such, we are taking the following actions:

- Restrict non-essential travel for Service Authority employees and approved a liberal sick leave policy.
- Reminded employees about simple hygiene habits they can practice at home and at work to prevent the spread of illness.

Our customers depend on us to provide reliable water and sewer services. Therefore, the Service Authority is staffed accordingly and will maintain our level of service to our customers.
